Produkte Beschreibung

PR: Paneel aus Polyurethan mit Marmorstaub.

Das PR Paneel setzt sich zusammen aus einer ca. 4 mm dünnen Schicht aus Marmorstaub und einer Schicht Polyurethan mit hoher Dichte.

All dies macht es sehr widerstandsfähig gegen jede Art von Wettereinflüssen wie Regen, Sonne und Schnee. Es ist für den Innen- und Aussenbereich geeignet. Das Panel hat ausgezeichnete thermische, akustische und Anti-Feuchtigkeit Eigenschaften.

HD: Panel High Definition

HD ist ein sehr innovatives Produkt, welches für alle Arten von Beschichtungen, Wänden, Mauern und Decken geeignet ist. Es besteht aus 16 verschiedenen Mineralien - unter anderem aus Stein, Marmor und Quarz.

Diese Zusammensetzung macht unser HD Panel High Definition besonders beständig gegen Wettereinflüsse und Feuer. Ausserdem überzeugt es durch seine Widerstandsfähigkeit gegen Abrieb und Chemikalien. Selbst grosse Temperaturunterschiede schaden unserem Panel nicht.

Das HD Panel absorbiert kein Wasser. Die Eigenschaft zur Wasseraufnahme ist abhängig von der Oberflächenbeschaffenheit und Porosität und entscheidend für ihre Frostsicherheit, so dass das HD Panel High Definition bei hohen Temperaturschwankungen weder Form noch Farbe verliert.

Aufgrund der hohen Qualität und des geringen Gewichts ist die Montage sehr einfach. Das HD Panel ist besonders geeignet für stark frequentierte Räume, Fassaden und andere grosse Gebäude, an Orten mit hoher Luftfeuchtigkeit, Saunen, etc. Der minimale Verschleiss und die hohe Resistenz machen das HD Panel High Definition zu einem sehr hochwertigen Material.

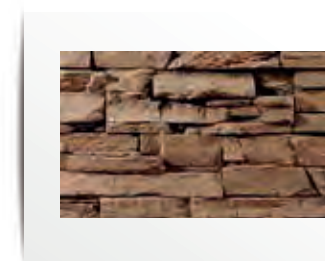

Masstoleranzen: Alle genannten Gewichte und Massangaben sind in cm und so genau wie möglich angezeigt, können aber bis zu 2 % durch Expansion und Schrumpfung während der Produktion abweichen.
